

// SAP Business One Cloud is the frontline of doing business."

Pontus Björnsson, CEO, Phoniro Systems AB.

Phoniro accelerates the digitization of healthcare with SAP Business One

E-Health company, Phoniro, develops high-tech solutions for digitising residential healthcare, delivered on a single IT platform, enabling care-givers to devote more time to elderly patients. The business had outgrown its finance system and chose SAP Business One Cloud on SAP HANA, to provide more control over logistics and support for public procurement. With SAP Business One Cloud, Phoniro can become more customer-oriented, reduce delivery lead times, accelerate financial close and monitor business performance via mobile dashboards.

Challenges and Opportunities

- Outgrowing legacy system which was focused on finance
- Lack of logistics and procurement functionality to deal with recurring business and contract backlog
- Needed data-driven insight to become more customer-oriented
- Ambitions for further international expansion

Why SAP and Partner

- Phoniro is a cloud-first business and was looking for a cloud-based ERP solution
- SAP Business One Cloud delivery means always having the latest release
- Littlefish is a local partner with local knowledge

Value-Driven Results

- Gained visibility and control over logistics and reduced delivery lead times
- Better access to reliable information
- Provides a robust, efficient foundation for expanding into additional countries
- Mobile dashboards put business KPIs at senior management's fingertips
