

# // We choose SAP Business One because Norex likes to be in the front line."

Andreas Hansson, Material and Quality Technician, Norex International AB.

## Norex drives sustainable growth with SAP One Cloud

Norex is a sustainable trading company that maximizes the value and minimizes wastage of scrap and secondary steel. As the company acquired its service division in 2007, its business systems were no longer meeting its needs. Norex chose to run SAP Business One in the cloud, to enable its on-the-go employees to access information anywhere. With key benefits including simplified, automated and accelerated workflows, SAP Business One is helping the company to drive growth and provides the foundation for developing a web-based sales solution to extend its reach.

### Challenges and Opportunities

- Existing system was failing to keep pace with the business and increasingly costly to maintain.
- Acquisition of service division demanded a change of solution.

### Why SAP and Partner

- SAP Business One Cloud is a flexible, affordable and scalable solution.
- Cloud deployment makes it easier for on-the-go employees to stay connected.
- LittleFish came highly recommended, and provided a great implementation experience and follow-up support.

### Value-Driven Results

- Simplified business processes.
- Easy to carry out mass updates.
- Accelerated workflows.
- Cloud delivery makes the solution future-proof.
